

Bellevue School District Nutrition Services

Mission Statement: To meet the nutritional needs of the students and staff of the Bellevue School District by offering a variety of quality, nutritious meals in a timely, effective manner. We are committed to increasing participation by providing a friendly, professional, clean atmosphere focused on students as customers.

Quality: The program will offer quality food products which will be visually appealing, taste good and measured by surveys.

Nutritious: The program will meet nutritional goals and standards set forth by the USDA and the American Dietetic Association and measured through computer analysis.

Cost-Effective: The program will feed the students of the Bellevue School District by purchasing, storing, preparing, transporting and serving meals in an efficient and cost-effective manner. This will be measured by maintaining a break-even budget.

Education: The program will support educational goals for students by emphasizing the relationship between nutritious foods, good health, and a satisfying life. This will be measured by testing and observing food choices.
